ABSTRACT

This study followed up 79,812 vocational job training completers and 316 vocational job training leavers in Ohio for the school year 1981-82. Data were gathered in January 1983 for the 1982 graduating class. The results of the study showed that economic benefits resulted from completing a vocational job training program. Even with the severely depressed economy, 83.9 percent of the secondary program completers available for work obtained jobs with only 16.1 percent being unemployed. The 16.1 percent unemployed vocational youth compared favorably to 23.9 percent of the overall unemployment attributed to age bracket 21 and under from the October 1981 through September 30, 1982 report from the Ohio Bureau of Employment Services. The 23.9 percent general youth unemployment is almost one-and-one-half times higher than the 16.1 percent reported for program completers available for work. The postsecondary and long-term adult program completers available for work had 89.5 percent working versus only 10.5 percent unemployed. For the same period, the Bureau of Employment Services reported the adult unemployment rate for January 1982 as 14.9 percent--4.5 percent higher than the 10.5 percent for vocational program completers. (The report includes in-depth analyses and computer breakouts of numerous data, including placement trends, average hourly wages, the Standard Occupational Classification System, employment status, employer follow-up, and state totals.) FOREWORD

The Follow-up of Ohio's Secondary, Postsecondary and Long-Term Adult Vocational Program Completers for School Year 1981-82 reflects the economic benefits derived from completing a vocational job training program supported by investment of both individuals and tax funds. Even with the severely depressed economy, 83.9 percent of the secondary program completers available for work obtained jobs with only 16.1 percent being unemployed. The 16.1 percent unemployed vocational youth compares quite favorably to 23.9 percent of the overall unemployment attributed to age bracket 21 and under from October, 1981 through September 30, 1982 report from the Ohio Bureau of Employment Services. The 23.9 percent general youth unemployment is almost one and a half times higher than the 16.1 percent reported for program completers available for work.

The postsecondary and long-term adult program completers available for work had 89.5 percent working versus only 10.5 percent unemployed. For the same period, the Bureau of Employment Services reported the adult unemployment rate for January, 1982 as 14.9 percent which is 4.5 percent higher than the 10.5 percent for vocational program completers.

The continuing unusual success of vocational training in preparing students for work and meeting employment needs of business and industry is reflected in this follow-up of 79,812 vocational job training completers and 316 vocational job training leavers in the report. Significant findings are enumerated in the trend charts, taxonomy breakouts of specific occupations by type of educational agency, and the tables included in this narrative. A third party evaluation by the users of the vocational products, the employers, indicates the outstanding performance of vocational job training program completers. Thus, the report appears to reflect the soundness of investing funds to train students for jobs and for life as productive workers and citizens in society. If these students would have graduated without salable job skills or had dropped out prior to graduation, they would have very likely been unemployed. In some instances, these unskilled graduates and dropouts may resort to criminal activities to obtain money or they become an additional burden to society as they end up on the welfare rolls.

In-depth analysis computer breakouts should enable vocational education administrators and individual teachers to compare the performance of their vocational programs to the state population. Thus, educational administrators, teachers, and other concerned citizens can use the report for evaluation purposes and to assist them with long-range planning.

INTRODUCTION

The statistics in this report, with supporting summary tables and graphs, represent the total state vocational education follow-up data reported for FY82 on the VE-23S form "Placement of Program Completions in Vocational Education." This follow-up form is required annually. The follow-up survey was done in January, 1983 for the 1982 graduating class.

Table I on Follow-up Secondary

Some significant data during the years 1978-82 seem to support investment in secondary job training programs as a means to reduce unemployment. For example, Line 8 in Table 1 indicates that in FY82 only 16.1 percent of those who completed the secondary programs were unemployed. The general unemployment rate of 23.9 percent attributed to age bracket 21 and under by the Ohio Bureau of Employment Services as of September 20, 1982 is almost one and a half times the 16.1 percent reported for vocational program completers which seems to indicate very sound programming. The Employed Field Related to Training Line 5 only decreased 2.7 percent from the 67.2 percent in FY81 to 64.5 percent in FY82 due primarily to severely depressed economic conditions. The prior years FY78 through FY81 would also be similar to FY82 if the number entering the Armed Forces in Line 2 were not included in Employed in Lines 5 and 6 on older reports. Status Unkown on Line 12 dropped from 4,054 or 7.2 percent of Total Completions Line 1 to 3,476 or 6.4 percent due probably to intensified data collection efforts of both state and local staff.

Table II on Postsecondary and Adult Long-Term Follow-up

Follow-up statistics during the past five years indicate that postsecondary and adult long-term placement has averaged 94.3 percent with only 5.7 percent unemployed six months after program completion Lines 5 and 6). Ohio General Unemployment over the same period has averaged 9.1 percent which is one and six-tenths times the 5.7 percent vocational completer unemployment. Thus, these vocational program completers seem to justify the investment in postsecondary and adult long-term programs to provide employment opportunities.

For FY82, vocational completers available for work had 76.4 percent placement in their field of training and related fields (Line 5) plus another 13.1 percent with employment in other fields (Line 6) which makes the state total employed after completion of job training 89.5 percent with only 10.5 percent unemployed (line 8) versus the Ohio General Unemployment rate of 12.5 percent average for 1982.

This Ohio General Unemployment of 12.5 percent for the year versus the completers rate of 10.5 percent seems to indicate vocational education success in placement at a time when unemployment is very high.

Status Unknown on Line 12 of 13.4 percent for FY82 versus 12.6 percent in FY81 and 11.5 percent in FY80 continues to indicate a slight increase. This increase may be caused by more students going parttime and taking longer to complete a training program because of the depressed economy. The longer training time causes more teacher contacts to be lost which results in more students being placed in the Unknown Status category.

TABLE 1

FOLLOW-UP OF SECONDARY PROGRAM COMPLETERS IN VOCATIONAL EDUCATION 1978-1982--State

	Number of Completers					Percent of Annual Total				
	1982	1981	1980	1979	1978	1982	1981	1980	1979	1978

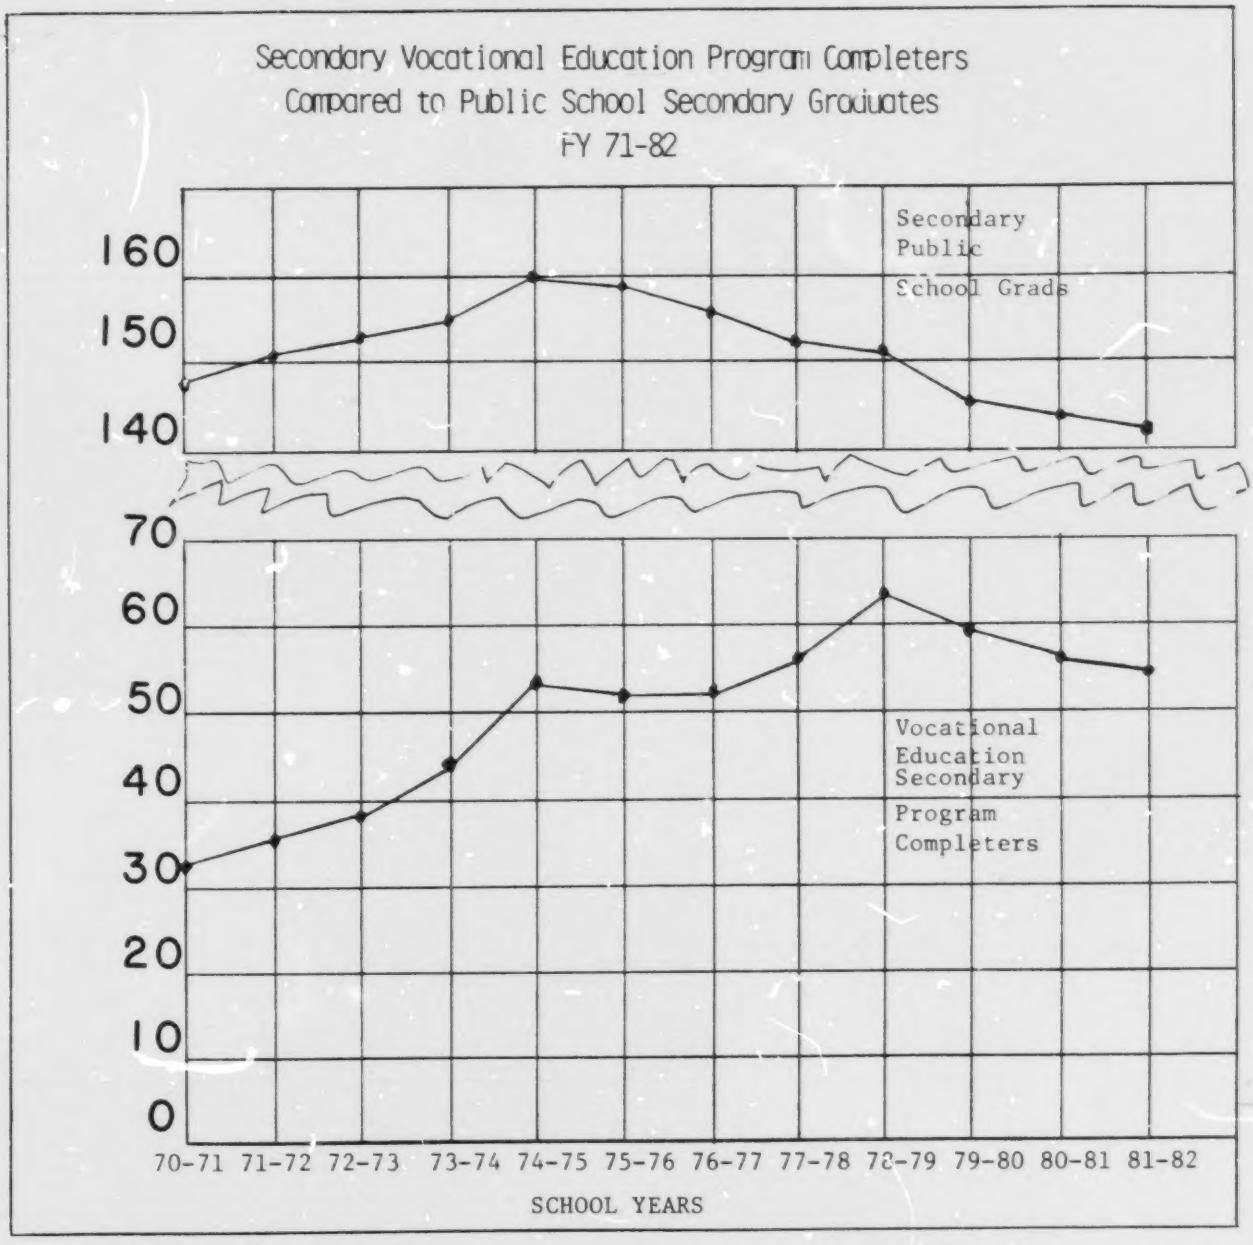
(d) Armed Forces are not included in placement calculations after 1979.

RSEEgas7-1-83

PLACEMENT TREND CHART



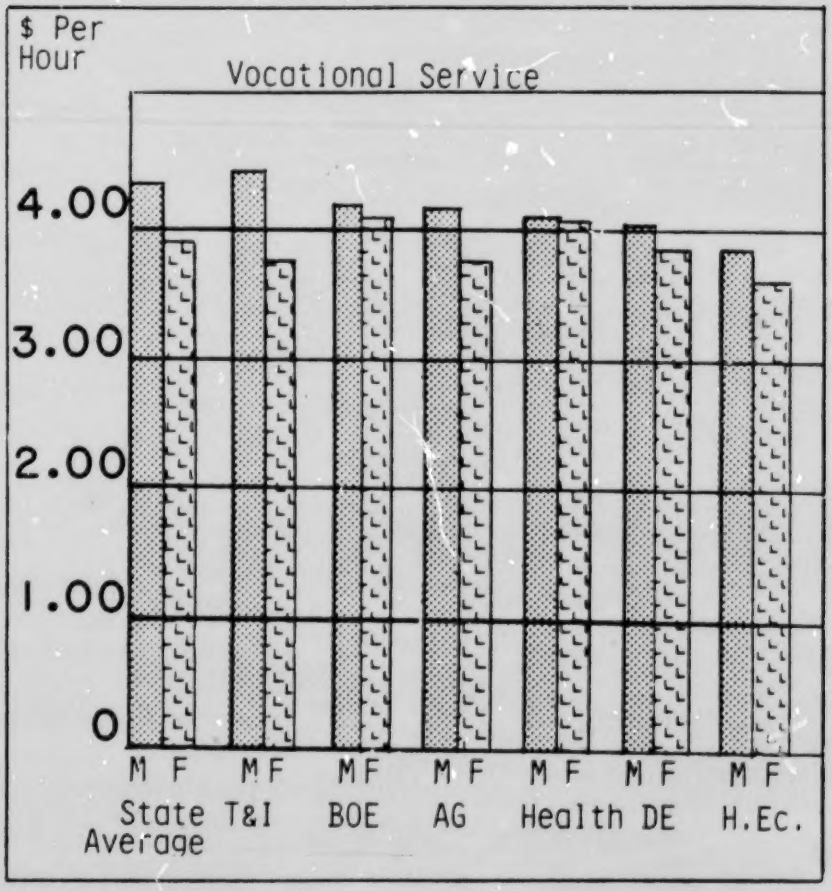
Vocational Education secondary job training program completers almost doubled between FY71 with 32,253 completers to 62,580 in FY79 as indicated by the lower chart line above. The decline in birth rates as the reader knows has caused public school enrollment to decrease. However, vocational education has grown faster and decreased at a slower rate than public secondary enrollment during the past eleven years according to findings above. This growth and retention rate of secondary job training completers seems to prove the unusual success of Vocational Education in offering job training programs that are meeting student career choices.

Annual High School Graduates Report FY71-FY82 from Division of Computer Services and Annual Vocational Secondary Follow-up by RSEE, Division of Vocational Education, State Department of Education.

Secondary Vocational Program Completers

Average Hourly Wage

By Service FY82



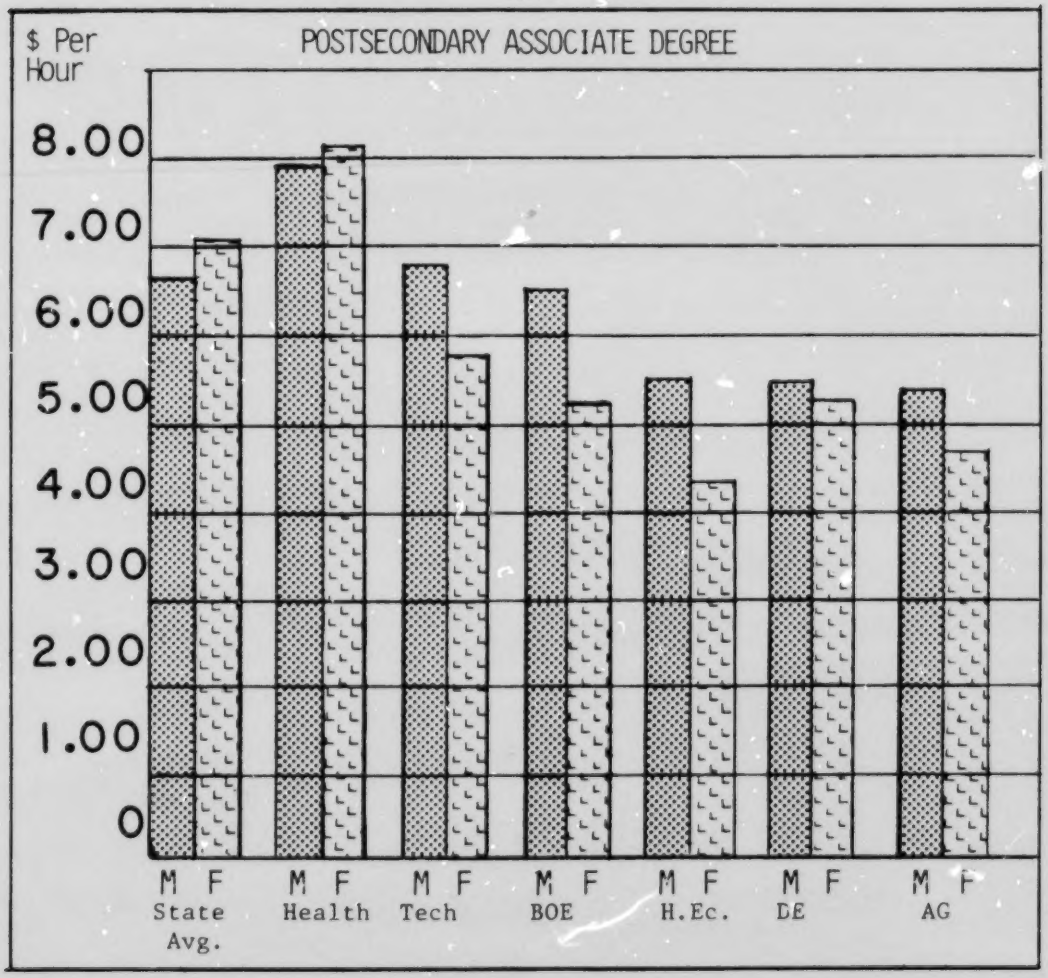
The FY82 State average hourly wages in related fields for 54,810 vocational program completers in 135 different occupations was $4.31 versus $4.46 in FY81 for males and $3.92 versus $3.91 in FY81 for females. However, the entry level wages in the five highest wage areas varied across service area and even by sex: Performing Arts (04.1502) $13.12 Females, Building Maintenance (17.1011) $8.25 Females, Aircraft Operations (17.0402) $7.20 Males, Maritime Occupations (17.0801) $6.78 Males, and Masonry (17.1004) $6.56 Females.

In programs reporting wages for both sexes, females had higher hourly rates in 28 occupations versus 57 for males. Five occupations reported the same wages for both sexes and 45 listed wage rates for only one sex. Thus, females had higher average hourly starting rates in about one out of every three jobs that reported rates for both sexes in FY82 versus one out of every six in FY81.

Postsecondary Associate Degree Completers

Average Hourly Wage

By Service FY82



The FY82 state average hourly wage for 5,942 Associate Degree completers in related fields was $6.63 for males and $7.02 for females in 65 occupations reported. The higher wage rate for females for both FY81 and FY82 occurred mostly because of higher wage rate for females with large program enrollment in health occupations such as nursing. Females, out of 43 programs which had wage rates listed for both sexes, received higher hourly wages in 10 occupations plus 3 which had equal wages for both sexes. Thus, the female rates were higher than males in approximately one out of every four programs reporting wages for both sexes.

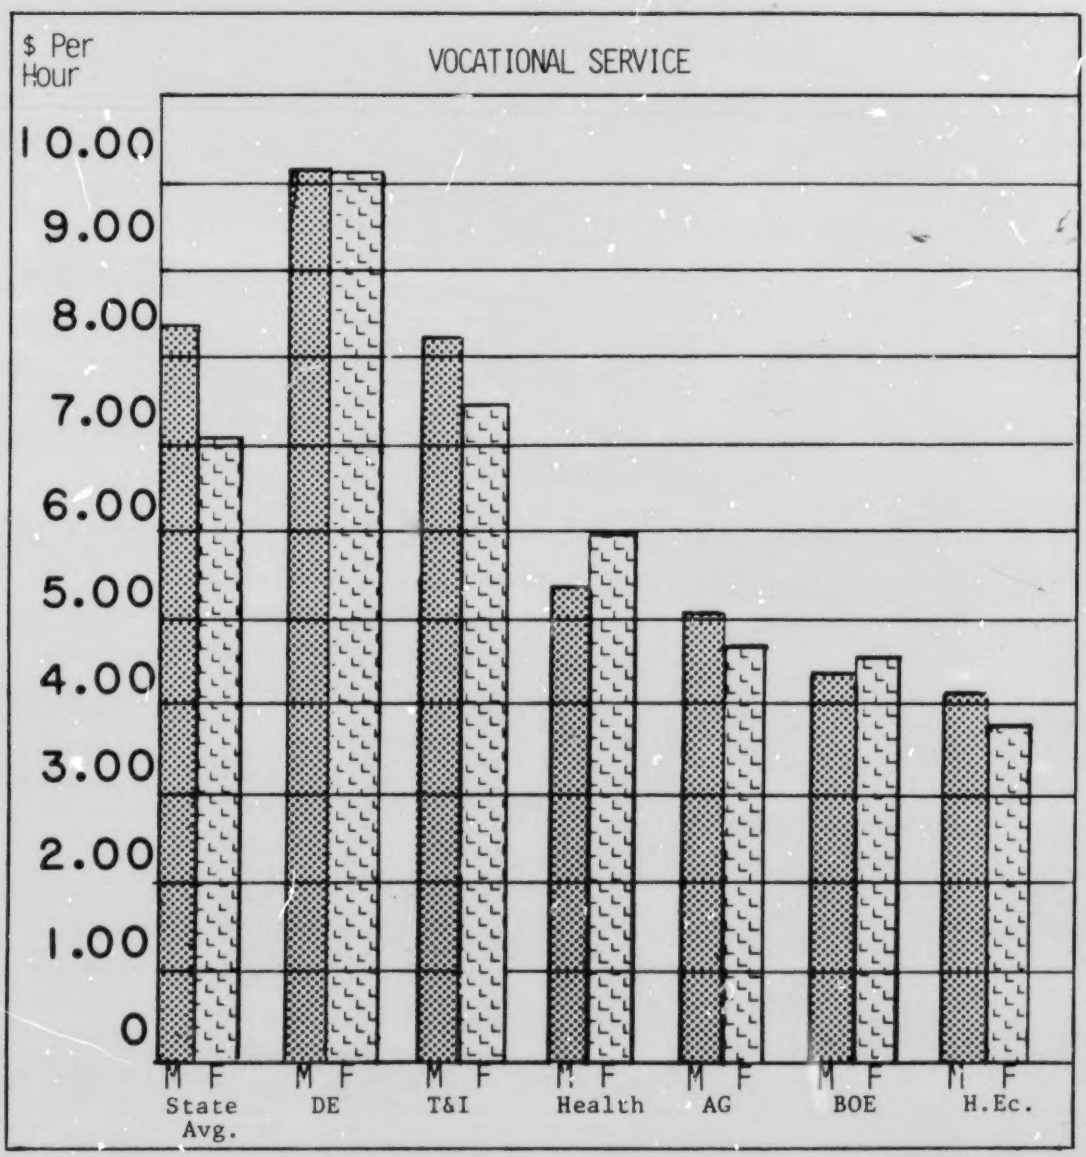
RSEE: gs 7-11-83

Long Term Adult

Vocational Program Completers

Average Hourly Wage

By Service FY82



The State average hourly wage for FY82 completers in related fields was $8.35 for males and $7.07 for females in 64 occupations reported. Females had higher hourly wages in 11 occupations and equal wages in 10 occupations out of 47 listing rates for both sexes. Thus, approximately one out of every four programs with wages reported for both sexes had higher wages for females.

ANNUAL STUDENT COMPLETER/LEAVER
FOLLOW-UP REPORT VE-23S

Columnar Explanation

Executive Summary Report--The Annual Executive Student Follow-up Report for Secondary Completers begins on page 12 with state totals by service starting with Agricultural Education and ending with a Grand Total for the State at the bottom of the page. Columns have been numbered for reading ease and for reference on page 12 which is the first page of the computerized report. To assist the reader in quickly locating specific sections of the overall computerized report, the item(s) to be emphasized on each page are boxed in at the left side of the page. For example: the specific items on page 11 are, "Program Level-Secondary Completion Status: Completers" which has been boxed in with a single ink line. Columns 1 and 2 refer to the service area taxonomy and taxonomy title plus the Standard Occupational Classification (SOC) starting on page 13 as page 12 is the state summary. Columns 3 through 10 refer to the Employment Status of the Completers. Columns 11 through 13 indicate the level of the program--secondary, postsecondary, and long-term adult. Column 14 lists the average hourly salary reported for field trained or related work. Available for Placement is reported in Total in Column 16 with Employment in Related Field rate being enumerated in Column 17, Nonrated Employment rate in Column 18 and the Unemployed rate in Column 19.

After the summary on page 12, pages 13 through 28 break out Secondary Program Completers, Associate Degree Completers on pages 29 through 38, and Long-Term Adult on pages 39 through 47 by six-digit occupational program taxonomy code. State totals are broken on the first page of each section example: secondary page 12 postsecondary page 29 and long-term adult page 39.

Employment Status (Follow-up by Racial/Ethnic/Sex)--Follow-up by race and sex starts on page 48 and continues through page 51 for completers on the top half of the page and Leavers Only on the bottom half by levels of education. Columns 1 and 2 break out employment status by race and by sex. Column 3 represents the universe and column 4 indicates the number in the sample returned for this report. Columns 5-7 indicate Employed status--military, related to training, and in field not related to training. Column 8 enumerates the number pursuing additional education. The number available for work and unemployed are listed in column 9 while the number not seeking employment are listed in column 10. The number with Status Unknown are listed in column 11.

Employment Status (Follow-up) of Special Needs--The break out for Secondary Special Needs Completers starts on page 52 on the top half of the page with Leavers Only on the bottom half. The Special Needs enumeration by institution level continues through page 55. The specific special need is enumerated in column 1 in this section.

Columns 2 and 3 represent the completers by universe and by number in this sample. Employment Status is reported in columns 4-6. Pursuing Additional Education is listed in column 7. The number available for work and unemployed are broken out in column 8 while column 9 specifies the number not in the labor force. If the status was unknown it was reported in column 10.

Instructional Program SOC and by Average Hourly Salary--The six-digit breakout of instructional programs by Standard Occupational Classification (SOC) are listed on pages 56-62. However, each instructional program requires two pages to enumerate all of the related SOC codes listed on page 11 for that particular program. For example: 01.0100 Ag Production is the first item reported on pages 56 and 60. The largest number reported on that line are in SOC "55" which is "Farm Operators and Managers" according to the Standard Classification (SOC) list on page 10.

Columns 1 and 2 contain the six-digit taxonomy number and program title. Columns 3 through 28 contain the two-digit SOC code numbers. The average hourly rate for the male and female completers working in related fields is listed in Section II Columns 29 and 30. Section III Columns 31 and 32 represent only totals for male and female completers in related fields. The total number reported for each line for the various SOC codes for that instructional program includes completers in related fields plus non-related fields which are not included for columns 29-32. Thus, the SOC totals may be higher due to the inclusion of non-related occupations.

Standard Occupational Classification (SOC) System

Background

The Standard Occupational Classification (SOC) provides a mechanism for cross-referencing and aggregating occupation-related data collected by social and economic statistical reporting programs. The system is designed to maximize the analytical utility of statistics on the labor force, employment, income, and other occupational data collected for a variety of purposes by various agencies of the United States Government, State agencies, professional associations, labor unions and private research organizations.

The SOC covers all occupations in which work is performed for pay or profit, including work performed in family-operated enterprises where direct renumeration may not be made to family members. It is a coding system and nomenclature for identifying and classifying occupations within a framework suitable for use in and out of government. (a)

The Standard Occupational Classification Codes are listed below:

14	Management Related Occupations
17	Computer, Mathematical, and Operations Research Occupations
29	Registered Nurses
32	Writers, Artists, Performers, and Related Workers
36	Health Technologists and Technicians
37	Engineering and Related Technologists
38	Science Technologists and Technicians
39	Technicians: Except Health, Engineering, and Science
41	Sales Occupations, Commodities
42	Insurance, Real Estate, and Service Sales Occupations
45	Supervisors: Clerical Occupations
47	Clerical Occupations, Except Equipment Operators
48	Computing and Office Equipment Operators
51	Protective Service Occupations
52	Service Occupations, except Private Household and Protective
53	Private Household Occupations
55	Farm Operators and Managers
57	Forestry and Logging Occupations
58	Fishers, Hunters, and Trappers
61	Construction Trades
65	Transportation and Material Moving Occupations
67	Mechanics and Repairers
72	Precision Production Occupations
77	Fabricators, Assemblers, and Hand Working Occupations
99	Occupations Not Elsewhere Classified

EMPLOYER FOLLOW-UP REPORT VE23-E

Evaluation by Product Users

Background:

Employer evaluation of Completers/Leavers in School Year 1981-82 during FY83 marks the fourth year that an outside party, the product user, has evaluated vocational trainees with rather significant results. The PL 94-482, the Federal Education Act of 1976 required more extensive data and information on all vocational program completers and leavers than was currently reported for more effective program accountability. Therefore, the data in this report for the fourth year represents employer input from one-fifth of the school districts in Ohio. One-fifth of the state's school districts with students in related programs was accepted by the Federal representatives as a representative sample. The sample size was accented as it matches the once every five-year state and local evaluation programs for improving, developing, and expanding vocational programming (PRIDE). Thus, the year preceding PRIDE, the employers were contacted locally to determine program quality which was used by the local education agencies in their self-review and by the state vocational division to improve program quality.

Employer Follow-up Validity and Quality:

The sample includes the PRIDE districts who will be evaluated in FY84 for those completer/leavers in all vocational levels--secondary, postsecondary, and long-term adult in related occupations. Nine thousand nine hundred sixty-nine (9,969) vocational program completers/leavers are on file and were sent to all schools in PRIDE FY84 for employer contact. Eight thousand three hundred sixty-six (8,366) were returned by schools from employers. With 9,996 being sent and 8,366 being returned, a return rate of 83.9 percent was achieved. The vocational program completers had a 84.4 percent return and the program leavers 70.5 percent.

Columnar Explanation:

On page 69 taxonomy number in column 1 lists the instructional program taxonomy code by service and individual taxonomies within each service. The name of the vocational training program is specified in instructional Program Column 2. The number in column 3 represents the number of vocational program completers/leavers in one-fifth of Ohio's vocational programs--the Universe. Column 4 represents the quantity returned--Sample.

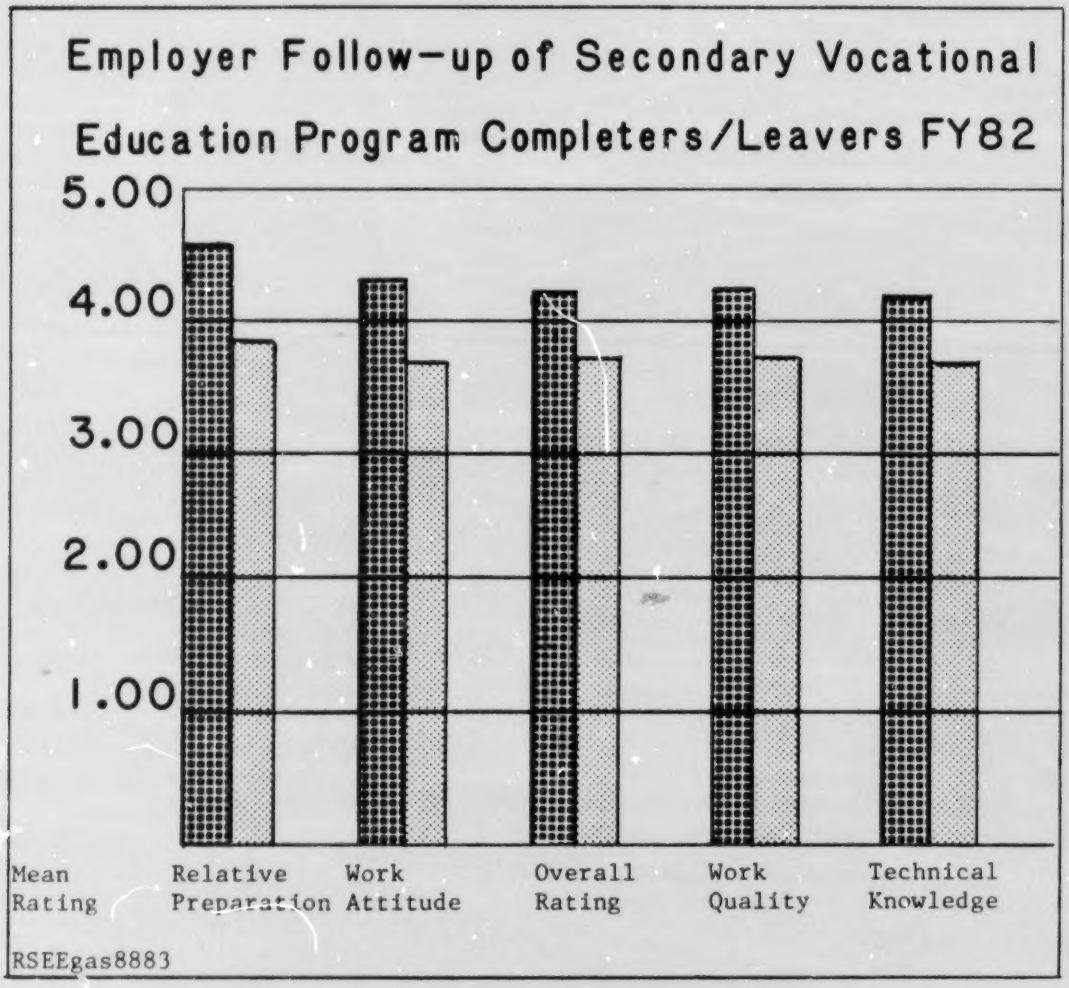
The Mean of Employer Ratings or average are enumerated on an employer rating scale by the employers of vocationally trained workers in their employment on a scale of 1 through 5. The 1 represents the poorest employee performance and 5 represents the highest performance by a worker as reported by his/her employer. Specifically, Technical Knowledge of the employee is reported in Column 5. Work Attitude of

the vocational employee is listed in column 6. The Work Quality of the worker's performance as viewed by the employer is reported in column 7. Overall Rating in column 8 represents a summary of the worker's job performance. Relative Preparation in column 9 indicates the employers' analysis of how well the worker rated in relation to other employees in his or her work group who did not receive such training.

EMPLOYER FOLLOW-UP OF VOCATIONAL EDUCATION PROGRAM
COMPLETERS/LEAVERS IN SCHOOL YEAR 1981-82

Secondary - Employers rated 3,751 vocational job training students who completed all of the vocational programs as outstanding in terms of technical knowledge, work attitude, work quality and relative preparation. As indicated in the bar chart on the next page, the trainees who completed all of the vocational programs received a rating of 4.28 percent in all categories on a 0 to 5 mean rating scale with 5 being the most qualified trainees for the employer's job needs. However, the 232 trainees who left without completing the job training program in all reports received a mean rating of 3.74 which seems to indicate the significant difference in skill development between completers of job training programs and program leavers.

Postsecondary - The employers' rated the 4,383 postsecondary vocational program completers as being outstanding in all rating categories - technical knowledge, work attitude, work quality and relative preparation. If the reader compares the rating 4.58 for completers of all the job training programs to the 84 trainees who left without completing the job training vocational programs, the difference is quite evident for the 4,383 completers versus the 84 trainees who did not complete the vocational program for a variety of reasons. Thus, the investment in vocational job training seems to be a worthwhile investment according to users of vocational graduates, namely, the employers.



Employers of 3,751 Secondary Vocational Job Training Program Completers rated these completers work performance as 4.58 or outstanding on a scale of 1 to 5 in all work performance categories versus 3.86 for program leavers as indicated by the graph above. This outstanding rating by an outside source, the employer, seems to indicate the success of vocational training for jobs and as a worthwhile investment in reducing unemployment rolls.

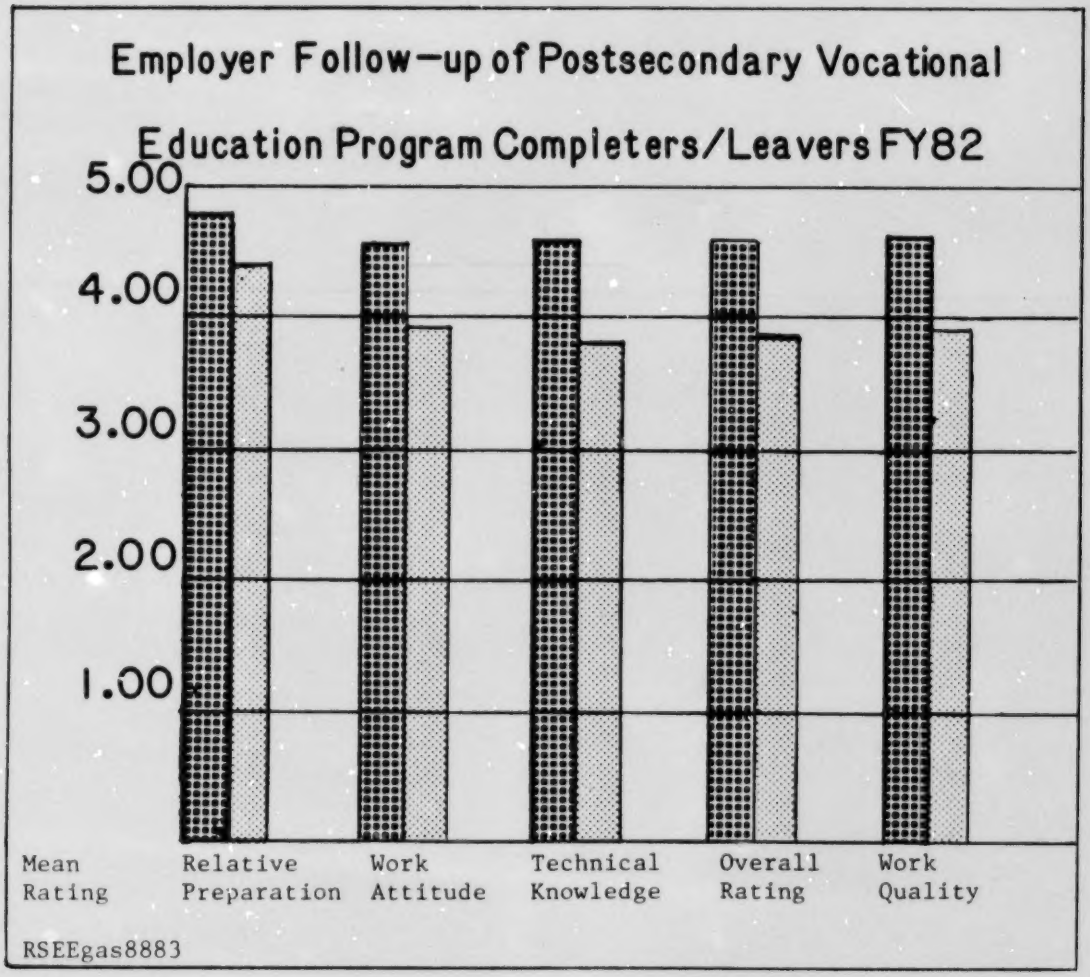
LEGEND: Mean rating by Vocational Education Program Completions Status Report from Employers for 3,983 vocational program trainees. Evaluation was made by employers for PRIDE 83-84.

Mean rating of 5 is excellent and 1 is low

3,751 trainees completed 100% of the Vocational Education Job Training Program

232 leavers (Dropouts) of the job training programs

RSEEgas8883



Employers of 4,383 Postsecondary Vocational Job Training Program Completers rated the completers work performance as 4.85 or outstanding on a scale of 1 to 5 in all work performance categories versus 4.43 for 84 program leavers as indicated by the graph above. This outstanding rating by an outside source, the employer, seems to indicate the success of Postsecondary Vocational training for technical jobs and as a worthwhile investment in reducing unemployment rolls.

LEGEND: Mean Ratings by Vocational Education Program Completions Status Report from Employers for 4,467 Postsecondary program trainees. Evaluation was made during Spring of 1983 for PRIDE 83-84.

Mean Rating of 5.00 is excellent and 1 is low

4,383 trainees completed 100% of the Vocational Eduction Job Training Programs

84 leavers (Dropouts) of the job training programs
